Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 August 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I (claims 1-32) in the reply filed on 8/13/2007 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4-18, and 22-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Howell (3,949,745). Howell discloses a delivery system that could be used to intravenously deliver contrast media comprising a media reservoir (10), a spike (14a) for accessing the media in the reservoir, a length of tubing (16,24,26) linked to the spike, a primer bulb (38) connected in-line with the length of tubing, wherein the primer bulb is compressible to create a head of pressure above the media in the reservoir to facilitate the flow of the media into the length of tubing, a valve mechanism (42,44) that can provide a fluid tight seal to isolate the reservoir, length of tubing, and primer bulb from the inflow of air from the external environment, wherein the length of tubing and primer bulb are isolated from the external environment before compression of the primer bulb, wherein the valve is a one-way valve and comprises a venting door (44), wherein the valve mechanism is linked to the spike and the spike is a vented spike, and wherein the bulb is made of a polymeric material.

Claims 1-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Manzie (5,505,707). See Figure 2 and the respective portions of the specification. Manzie discloses a delivery system that could be used to intravenously deliver contrast media comprising a media reservoir (120), a spike (123) for accessing the media in the reservoir, a length of tubing (116,140) linked to the spike, a primer bulb (130) connected in-line with the length of tubing, wherein the primer bulb is compressible to create a head of pressure above the media in the reservoir to facilitate the flow of the media into the length of tubing, a valve mechanism (174) that can provide a fluid tight seal to isolate the reservoir, length of tubing, and primer bulb from the inflow of air from the external environment, wherein the length of tubing and primer bulb are isolated from the external environment before compression of the primer bulb, wherein the valve is a one-way valve and comprises a venting door, further comprising a stop-cock (150), wherein the valve mechanism is linked to the spike and the spike is a vented spike, and wherein the bulb is made of a polymeric material.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theodore J. Stigell whose telephone number is 571-272-8759. The examiner can normally be reached on M-F 8:30-5:00.
